

EmaStandards

High performance Standards and Reference Materials
for Inorganic and Petrochemical Applications

About EmaStandards

The EmaStandards brand is offered by Elemental Microanalysis – a UK specialist in analytical consumables and reference materials for 40 years and winner of the Queens Award for International Trade in 2014. For more information go to www.elementalmicroanalysis.com

Accreditation

All EmaStandards products are manufactured from the highest purity materials and strictly controlled procedures under ISO 9001, ISO 17025 and ISO Guide 34 accreditation.

Suitability

These materials are suitable for analysis by ICP, ICP-MS, AA, IC and XRF.

Certification

Each product is supplied with a comprehensive certificate of analysis giving full details of the analysis and traceability. Contact us for a sample certificate.

Value

All EmaStandards products follow the Elemental Microanalysis tradition offering a value price without any compromise on quality or performance.

Applications

Our standards are used in laboratories across a wide variety of industries including:

- Industrial Quality Control
- Environmental
- Pharmaceutical
- Government
- Research
- Food
- Chemicals
- Used oil analysis
- Oils and additives
- Agriculture
